PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience building production web and mobile applications, with my strongest expertise in backend engineering. I work primarily with PHP, Laravel, and Node.js to design REST APIs and the business logic behind CRM, ERP, payment, and real-time systems, and I build the frontend with Vue.js and React, along with cross-platform mobile apps in React Native. I focus on clean, maintainable code, well-structured databases, and queries that stay fast as data grows.

PERSONAL INFORMATION

Location: Gulistan-e-Johar, Karachi, Pakistan
Date of Birth: 20 November 2001

Nationality: Pakistani
Gender: Male

WORK EXPERIENCE

Instant Solutions Lab

December 2024 — Present

Software Engineer (Full-Stack)

Working across the full stack on both web and mobile products. Building and maintaining REST APIs in Laravel and Node.js, developing interfaces in React and Vue.js, building cross-platform mobile applications with React Native, and collaborating with the team to deliver features on time.

Innovative Network

February 2024 — November 2024

Software Engineer — Backend

Worked on backend development for an ERP system and a Sales & Distribution platform. Built and improved multiple modules, and optimized database queries to improve performance across the reporting sections.

Marcel Technologies

October 2023 — February 2024

PHP Laravel Developer

Built backend systems for multiple client projects using Laravel. Developed REST APIs, implemented role-based access control (RBAC), and integrated third-party services based on client requirements.

Amigoz Tech

October 2022 — October 2023

PHP Laravel Developer

Worked on backend development for a CRM product. Built REST APIs, integrated Stripe for payments, and kept the codebase clean, organized, and easy to maintain.

TECHNICAL SKILLS

Backend: PHP Laravel Node.js RESTful APIs RBAC MVC Architecture

Frontend: HTML5 CSS3 JavaScript (ES6+) React.js Vue.js Bootstrap jQuery AJAX

Mobile: React Native Cross-Platform (iOS & Android)

Database: MySQL MongoDB Query Optimization Database Design

Real-Time: Pusher WebSockets Laravel Echo Webhooks

Tools & Integrations: Git & GitHub Stripe API Square API Bill.com Bouncie GPS

Third-Party API Integration

EDUCATION

- **Virtual University of Pakistan** 2024 — 2028
Bachelor of Science in Computer Science (BSCS)
- **Aptech Computer Education (ADSE)** 2020 — 2024
Advanced Diploma in Software Engineering
- **PECHS Government Boys College, Karachi** 2017 — 2019
Intermediate — Computer Science (Pre-Engineering)

LANGUAGES

Urdu — Native / Mother Tongue **English** — Professional Working Proficiency

KEY PROJECTS

- **CRM Platform**
[Full-Stack](#) · [Laravel](#) · [MySQL](#) · [Stripe](#)
Built the backend for a CRM system that handles the sales process, upsells, and payments through Stripe. Worked on keeping the code clean and easy to update as new features were added.
- **TicketDrop**
[Full-Stack](#) · [React Native](#) · [React.js](#) · [Node.js](#)
Built a mobile-first events and ticketing platform end to end — a React Native app, a React.js admin panel, and a Node.js backend. Features include event browsing, a ticket basket, packages, live auctions, and lucky draws.
- **Chat Messenger**
[Full-Stack](#) · [Laravel](#) · [AJAX](#) · [Pusher WebSockets](#)
Built a real-time chat application with one-on-one and group messaging, image sharing, and voice notes. Used Pusher WebSockets with Laravel Echo to make messages appear instantly without page refresh.
- **Enterprise Resource Planning (ERP) System**
[Backend](#) · [Laravel](#) · [MySQL](#)
Worked on a multi-module ERP system covering Purchase, Production, Sales, and Finance. Helped build and improve different modules and worked on fixing slow database queries in the reporting sections.
- **Sales & Distribution (S&D) System**
[Backend](#) · [Laravel](#) · [MySQL](#)
Built backend modules for a Sales & Distribution system including purchase orders, sales tracking, and basic financial features to help the business manage its operations more efficiently.
- **RCG Tracker — Project Management Tool**
[Full-Stack](#) · [Laravel](#) · [Vue.js](#) · [Square](#) · [Bill.com](#) · [Bouncie GPS](#)
Worked on a project management tool for field operations. Added features for job and appointment scheduling, live vehicle tracking using Bouncie GPS, and connected third-party services like Square for payments and Bill.com for invoicing.
